

OVERHEAD BIN AND MONUMENT ATTACHMENT SUPPORT SYSTEM

Abstract

A monument support system (90) for an aircraft (92) includes multiple aircraft frame elements (16"). An adapter bridge (93) is coupled to the aircraft frame elements (16") and has multiple attachment points (20"). A coupling member (110) is coupled to the adapter bridge (93). A monument (96) is coupled to the frame elements (16") via the adapter bridge (93) and the coupling member (110).
